

G20 Summit 2023 Prioritizes Education in promoting global economic growth

Ayushi Agarwal · 16 December 2022

Education is expected to be a priority at the G20 summit in 2023. Find out how we can showcase our impact and outshine during the G20 Presidency

The G20 is an international forum comprising 19 countries and the European Union. In recent years, a particular focus of G20 has been on education, considering its importance in fostering economic growth and development.

Education is one of the priority areas of the G20 summit 2023

Now, as India will host the 2023 G20, education is expected to be one of the priority areas of discussion. This will provide an opportunity for India to showcase its education sector progress and collaborate with other G20 member countries on initiatives that aim to improve access to education, increase its quality, and promote innovation.

Our Honourable PM Narendra Modi Ji and Union Education Minister Dharmendra Pradhan have emphasized on the importance of education and its role in promoting economic growth and development in India.

Considering the G20 summit 2023 opportunity, Narendra Modi Ji conceptualized a “*Unique Interactive Programme – Pariksha Pe Charcha*.” Here, students, parents, and teachers across the nation will get the opportunity to interact with him and discuss the ways to overcome the stress of examinations to celebrate life as an Utsav.

Similarly, on Wednesday, in reference to, G20 Education Minister Dharmendra Pradhan Ji said, “Education is one of the priority areas of the G20 summit 2023” He called for widespread preparations for the G20 summit in India. He further said, “The meeting under India's G20 presidency is also an opportunity to share what the country has achieved in the education sector, especially after the launch of National Education Policy (NEP) 2020,”

Student's comfort with tablet-based learning reflects the success of the education sector

Successors of Edtech startups that can be showcased at the G20 Summit 2023

As the G20 summit will support the use of technology in teaching and learning, it creates opportunities for Edtech startups for funding and collaboration. To achieve this,

- We should talk about how digital learning solutions are making learning interactive and personalized to empower students to learn at their own pace.
- We should project how education technology is tailored to individuals' learning needs and preferences.
- Also, how Edtech startups have reduced the cost of education and made it more affordable for

students, teachers, and families.

Thus, iDream Education believes that by hosting the 2023 G20 summit, India can shape the global education agenda and benefit from the G20's support for the education sector.
