

# Can Budget 2024 improve adoption of Digital Learning in Govt Schools?

Rohit Prakash · 30 June 2024

*A brief, video-centered newsletter entry in which the author shares two suggestions for encouraging regular, consistent usage of digital learning infrastructure already provided to government schools by state governments, CSR programs, and NGOs. He invites readers to share thoughts, suggestions, or case studies of effective usage that has led to improved education outcomes.*

---

Hi Reader,

In the video above, I have shared two suggestions for how we can bring regularity in the usage of digital infrastructure which is being provided to the government schools by the states, by CSR and various NGOs. It is imperative that we think of strategies and ways through which the benefit of investing so much in digital education and digital learning reaches the end beneficiaries which are the teachers and the last-mile students. And it will only happen if there is a way by which our teachers can regularize the usage of this equipment and the digital content being provided to them.

In case you have any thoughts, suggestions, or know of actual case studies where good usage of digital infrastructure is happening and which is leading to improvement in education outcomes, please do share them with me at [email protected]

Thanks and Regards,

Rohit Prakash
