

Happy Children's Day! Celebrate it by Booking a FLN Content Demo With Us

Rohit Prakash · 31 October 2024

A Children's Day newsletter inviting readers to a demo of iDream Education's Foundational Literacy and Numeracy (FLN) content, designed to ease the workload of Anganwadi workers and early-grade teachers. It highlights alignment with the National Curriculum Framework's three developmental goals, broken into 13 competencies and 57 measurable learning outcomes, plus a Vidya Pravesh readiness module for Class 1 preparedness.

Hi,

Happy Children's Day! I hope you had a wonderful time celebrating with the little ones in your lives.

Yesterday, we commemorated Pandit Nehru's birthday, a leader who held a special place in his heart for children. His vision for a bright future for India was deeply rooted in nurturing and educating young minds.

In the spirit of Chacha Nehru's legacy and to further support our nation's children, I'm excited to invite you to a demonstration of our Foundational Literacy and Numeracy Content.

Being a part of the education sector, you are well aware of the unique challenges that Anganwadi workers and early education facilitators face. Beyond teaching, they juggle numerous responsibilities such as providing meals, classroom management, and various administrative tasks. While private primary schools operate under different conditions, these challenges are prevalent across Anganwadi centers and government schools. Keeping this in mind, our FLN content is designed to ease these burdens and empower facilitators and teachers to deliver effective and structured learning, even amidst their demanding schedules.

Why I Think This Demo Could Be Valuable for You?

If your education program focuses on early learning, here's what our content can offer:

- Our FLN content is thoughtfully created and curated in alignment with the National Curriculum Framework's three development goals, ensuring children build strong literacy and numeracy skills.
- Our content promotes competency-based learning by breaking down these three development goals into 13 key competencies and 57 measurable learning outcomes.
- With our content you can equip Anganwadi facilitators and primary school teachers with structured learning content that can be used effectively in classrooms, even when teachers are busy doing other administrative tasks.
- Vidya Pravesh content as a readiness module that could be used to ensure every child is ready for class 1.

There's so much more to explore. I would be happy to connect and walk you through our FLN resources and discuss how they can be implemented to achieve impactful results in your education program.

To request a demo, you may reply to this email and I will connect with you directly.

Thanks and Regards,

Rohit Prakash
